

ABDENA BELACHEW

Full-Stack .Net Core and React Developer

✉ Abdiolbelachew@gmail.com ☎ +251966780537 📍 Addis Ababa, Ethiopia 🌐 @abdenab

Professional Summary

I am a full-stack .NET Core and React developer with experience in Asp.Net MVC, React, and Node.js, specializing in building scalable, secure, and maintainable enterprise applications. I manage end-to-end project lifecycles from development and system design to deployment and ongoing support. My expertise includes integrating CI/CD pipelines with Jenkins and containerization applications with Docker to enable efficient, reliable releases, along with hands-on experience building and integrating solutions with Azure services. I also bring strong frontend experience alongside backend development, with a focus on system architecture design and delivering high-quality software. I'm passionate about optimizing workflows, writing clean and maintainable code, and continuously learning new tools and technologies to drive long-term project success.

WORK EXPERIENCE

Software Engineer, Cooperative Bank of Oromia Full-Stack Development & Project Leadership

2022 – Present
Addis Ababa

I developed and contributed to scalable enterprise applications using ASP.NET MVC / .NET Core, React, Node.js and SQL-based technologies, leading selected projects while actively participating across multiple enterprise initiatives from architecture design through deployment and ongoing support. I led development efforts, collaborated with cross-functional teams, and ensured successful project delivery while maintaining high engineering standards. I implemented Jenkins CI/CD pipelines to streamline build and release processes and used Docker containerization to ensure consistent deployments across environments. I focused on clean architecture, maintainability, scalability, and performance throughout the software development lifecycle.

Projects

Enterprise Project Contributions

- **Enterprise ERP Transformation Project (SAP Initiative)** Currently contributing to a large-scale ERP transformation project initiated with SAP, supporting system integration, workflow optimization, and alignment of technical solutions with business requirements across multiple enterprise domains.
- **Shareholder Management / General Annual Mapping System** Built a secure system for managing shareholders, subscriptions, dividends, and governance workflows, including real-time attendance tracking and automated voting processes using Asp.Net and SQL Server.
- **Risk & Compliance Management System** Developed a compliance platform for risk registration, tracking, and governance reporting, with document and email integration using LDAP/AD, .NET Core.
- **Outsourcing Management System** Created a vendor and workforce management system with attendance, incident tracking, materials handling, and SLA-based reporting using React, Node.js, and SQL Server.
- **Document / Archive Management System** Developed a secure digital archive system for storing and retrieving enterprise documents, including mass upload and compliance-focused access control. Using .NET core, React and Postgresql
- **Pharmacy Management System** Developed a secure healthcare system for managing inventory, sales transactions, SKU tracking, expiration compliance, and daily reporting for pharmacies.
- **Local Forex Office Management System** Built a currency exchange management system handling real-time financial tracking, secure transaction logging, and compliance reporting for local branches. Designed with high-precision financial processing.
- **Shop Inventory Management System** Developed a retail inventory system for stock control, product tracking, and reporting with optimized low-latency stock synchronization across storefronts.

EDUCATION

Master of Business Administration, MARYLAND INTERNATIONAL COLLEGE I completed a Master of Business Administration (MBA) with a 4.0 CGPA, demonstrating strong academic excellence in business strategy, leadership, and management.	2022 – 2024
Bachelor's degree in Computer Science & Engineering, ADAMA SCIENCE & TECHNOLOGY UNIVERSITY I earned a Bachelor's degree in Computer Science & Engineering with a 3.53 CGPA, demonstrating strong academic performance in software development, algorithms, and engineering fundamentals.	2016 – 2021

SKILLS

Technical Skills

- .NET Core / C#
- React.js / Node.js / Next.js
- Jenkins / CI-CD Pipelines
- Docker / Containerization
- Enterprise System Development
- REST APIs Development
- SQL Server / PostgreSQL / MySQL
- LDAP / Active Directory (AD)

Project & Management Skills

- Project Leadership & Team Management.
- Strategic Project Planning
- Time Management
- Reporting & Analytics
- Effective Communication & Stakeholder Engagement
- Enterprise Project Delivery
- Agile / Iterative Development Coordination
