EDUCATION

2022-2024
MARYLAND INT. COLLEGE

- Master of Business Administration

2016-2021
ADAMA SCIENCE & TECHNOLOGY UNIVERSITY

- Computer Science & Engineering

SKILLS

Technical Skills:

- .NET Core / C#
- React.js / Node.js
- Jenkins / CI/CD Pipelines
- Docker / Containerization
- Ent. System Development

Project & Management Skills:

- Project Leadership & Team Management
- Strategic Project Planning
- Time Management
- Reporting & Analytics
- Effective Comm. & Stakeholder Engagement

PROFILE

- I am a skilled .NET Core backend developer with experience in ASP.NET MVC, React, and Node.js. I specialize in building scalable and maintainable enterprise applications, managing full project lifecycles from development to deployment. My expertise includes integrating CI/CD pipelines using Jenkins and containerizing applications with Docker for efficient deployment.
- In addition to backend development, I have hands-on experience with frontend technologies and system architecture design. I am passionate about delivering high-quality software, optimizing workflows, and continuously learning new tools and technologies to drive project success.

WORK EXPERIENCE

Cooperative Bank of Oromia — 2022- PRESENT

Back Office Applications Administrator

Project Participation, Development & Deployment Experience

Full-Stack Development & Deployment: Experienced in designing, developing, and deploying scalable enterprise applications using ASP.NET MVC, .NET Core, React, and Node.js. Skilled in implementing CI/CD pipelines with Jenkins and containerizing applications using Docker to ensure efficient and reliable deployments. Key systems include:

- Shareholder Management System: Developed and deployed a platform for managing shareholder data, subscriptions, dividend distribution, and voting processes.
- Outsourcing Management System: Built and deployed a workforce management system with attendance tracking and reporting features to improve operational efficiency.
- Document / Archive Management System: Currently developing and preparing deployment of a secure solution for document storage, retrieval, and compliance management.
- Pharmacy Management System: Designed and developed a system for managing inventory, sales transactions, and reporting in pharmacy operations.
- Shop Inventory Management System: Built a retail inventory solution for stock control, product tracking, and reporting.
- Local Forex Office Management System: Developed a system to manage currency exchange transactions, record keeping, and financial reporting.

IT Project Management Team

Participated in SAP ERP implementation, managing user roles and permissions to ensure secure system access. Contributed to backup and recovery planning for data protection and system continuity, while collaborating with the team to optimize database performance and enhance overall system efficiency.
